

Learn more about your iPad & iPhone!

Apple Technology Classes

Instructed by Jonathon Gorman, Apple Certified Trainer

Tuesdays from 4–6PM

in the Eisenhower Room
\$20 per person, per class

Upcoming Dates & Topics:

Tips and Tricks /Managing Passwords– April 4

This introductory overview is a great way to make sure that the foundation for your iPhone or iPad is secure. We'll look at the physical device, dictating messages and shortcuts for editing them, using the basic apps most efficiently, and shortcuts that you can set up in Settings. This workshop is meant for both first time users and for those experienced with their devices. We'll make sure that everyone leaves more confident with their technology! EVERYONE struggles with passwords, and Apple has solved the problem, and the solution is FREE! We will also learn how to easily and safely store and access all of our sensitive information and have it perfectly sync across all of our devices!

Photography on iPhone and iPad – April 18

Photography on your iPhone and iPad – Our mobile devices carry some of the most powerful cameras and organizational systems out there. We'll look at all the ways to use the Camera app and then dive into how the Photos app helps you organize your memories so you can find them and share them in the future. This workshop is a lot of fun and will empower you to go out and start creating immediately after the workshop is over!
